

AI Voice Receptionist & Booking System SYSTEM OVERVIEW

Inbound calls + outbound new-lead auto-calls · one connected system · MVP, not a SaaS

SCOPE 1 — INBOUND: CALL → BOOKED → CONFIRMED → LOGGED

SCOPE 2 — OUTBOUND: NEW LEAD → AUTO-CALL → SMART RETRIES

One connected system — inbound and outbound share the same booking, SMS, group-chat & logging core

Escalation — live-person request, upset/confused, exact price, warranty/insurance, cancel/reschedule, can't understand, out of area

You stay in control — voice platform & phone usage billed to your own account; you set retry cadence and service area

\$1,100 fixed · ~2 weeks · paid per milestone — you verify each pieceSystem overview — prepared before release. for Maya
