

FrontDesk — AI Voice Receptionist & Booking

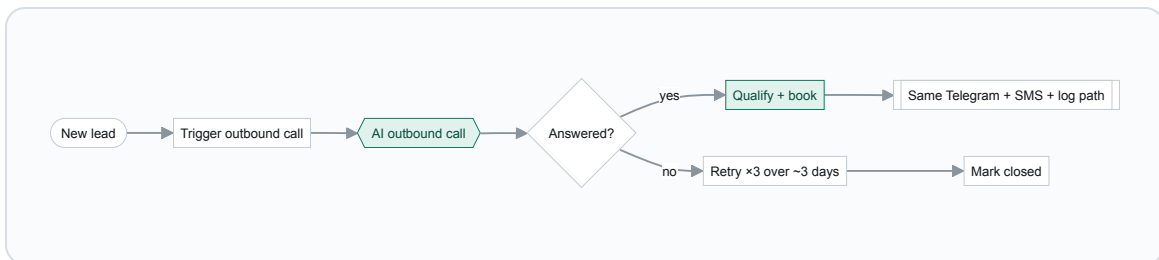

SYSTEM OVERVIEW

Inbound call & outbound lead → booked → confirmed on Telegram + SMS → logged

SCOPE 1 — INBOUND: CALL → BOOKED → CONFIRMED → LOGGED

SCOPE 2 — OUTBOUND: NEW LEAD → AUTO-CALL → SMART RETRIES

Telegram is real — tap Start on the bot, the booking confirmation lands in your chat (live proof of the integration)

Provider-abstracted — Telegram / SMS / store behind interfaces; Twilio + Vapi + Calendar are config in production

One connected core — inbound and outbound share the same book → confirm → log path
